

HIGHLY STYLED LIGHTING SOLUTIONS FOR RETAIL DESIGN SCHEMES

Introducing the highly styled Abolite Atrium Series, the perfect blend of aesthetics and functionality.

Designed to provide the utmost in aesthetic appeal and effective lighting distribution, the Atrium Series is the ideal solution for upscale retail spaces, shopping centers, airport concourse areas, restaurants and other public spaces, particularly for those spaces requiring increased uplight for brighter ceilings.

The contemporary appearance of the Atrium Series is as functional as it is beautiful, offering technologically advanced lighting options capable of excellent, efficient illumination for any application.

refractors

Clear acrylic refractors provide increased uplight for applications requiring brighter ceiling illumination, and are available in 12" and 16" diameters.

A 12" frosted refractor is also available.

mounting options

- Cast hub tapped for 3/4" NPT conduit
- Factory prewired available with 96" leads and 10' white or black cord sets with matching canopies
- Coiled cord and SWAG aircraft cable options available
- Suitable for 3/4" stems and/or gooseneck brackets
- 12" model available as a direct ceiling mount. Ballast will accommodate 26, 32 and 42-Watt PL lamp.

LENS ASSEMBLIES AND LAMP OPTIONS TO COMPLEMENT ANY DESIGN STRATEGY

spring-loaded, clear acrylic sag lens assembly

Clear acrylic sag lens assembly is secured to the refractor with an aluminum, spring-loaded ring that blends into the design for an unnoticeable, yet completely sealed lens/refractor connection.

lamp options

- **Compact Fluorescent** smart sockets feature a simple, push-pull thermoplastic design for ease of lamping (26, 32 and 42-Watt rated)
- **Incandescent** fixtures are medium-based porcelain (300-Watt/600-Volt rated)

ballasts

- High power factor electronic smart ballasts (26, 32 and 42-Watt rated) are prewired in fixtures designed for Compact Fluorescent lamps
- CFL ballast prewired in ceiling casting for 12" surface mount model
- Remote, high power factor ballasts required on fixtures designed for Metal Halide lamps

for high-performance and efficiency, choose compact fluorescent

A Compact Fluorescent lamp has the power needed to take your design scheme to a higher level of aesthetic appeal. A single 42-Watt Compact Fluorescent lamp, when compared to a 200-Watt Incandescent lamp:

- Produces the same amount of light
- Provides 13 times the lamp life
- Spends less than a quarter of the energy
- Reduces maintenance and operating costs

Enhance the architectural experience you've created with the illuminating power of a Compact Fluorescent lamp.

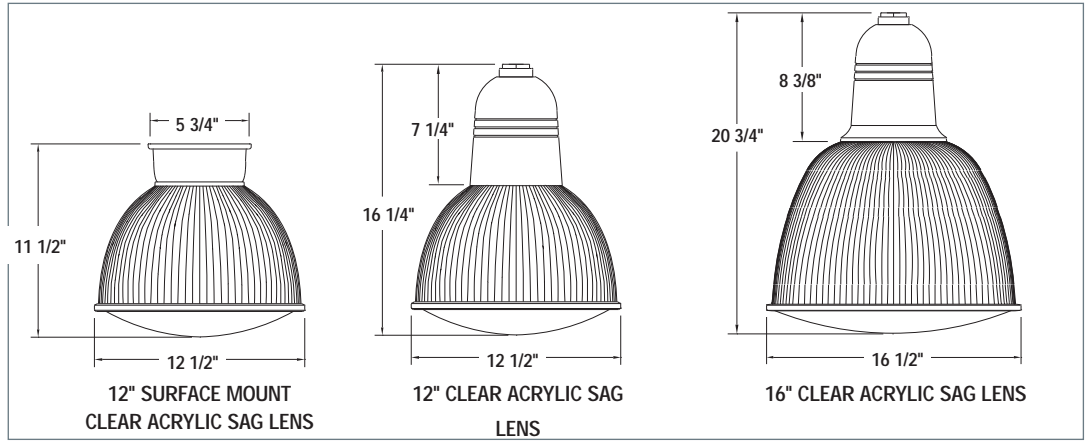

eye-catching appeal
